

"Fantastic Plastic Elastic" is the name behind the initials of this chair, whose primary characteristic is its formal effect: soft and sinuous, colourful and seductive. It is fantastic due to its exclusive technology which allows the creation of a robust but elastic structure by fixing a single plate of curved plastic onto two parallel aluminium tubes. The seat/backrest body is grafted onto the supporting aluminium structure, giving the chair both resistance and flexibility as well as lightness and practicality. It is available in three colours: opaline, blue and red. It can be conveniently stacked eight high and is suitable for bringing character to communal areas (from bars to work spaces) and domestic spaces. Thanks to its component materials, it survives perfectly outdoors.
